

## BUSINESS OPERATION SUPPORT SYSTEM FOR COMMUNITY SOLAR

As an alternative to consumer ownership and to provide an option for the low and moderate income population to benefit from the clean energy revolution, Community Solar is undergoing fast growth. Utilities, with their existing relationships with the developers and customers, play a key role in facilitating the transactions between the developers and customers and in so doing help remove the barriers to widespread adoption. However, Utility CIS and back office systems are inadequate in providing required support for the business operations.

### THE GRIDX BOSS FOR COMMUNITY SOLAR

The GridX Business Operation Support System (BOSS) provides turnkey operational and analytical support for Community Solar Programs. By integrating with the Utility CIS system, GridX enables utilities to streamline the management of developers and customers, settle transactions among customers, developers and utilities to consolidate billing, and provides support for customer acquisition and engagement.

### KEY FEATURES

- ▶ **CONSOLIDATED BILLING** by facilitating three party transactions, customers get one monthly bill and make one payment
- ▶ **CUSTOMER AND DEVELOPER MANAGEMENT** including enrollments, allocation, on-going management and online account access
- ▶ **SUPPORT FOR CUSTOMER ENGAGEMENT, ACQUISITION AND SERVICES** with personalized savings and rate analyses
- ▶ **SUPPORT FOR VDER AND NEM**  
Out-of-the-Box support for VDER and any complex NEM logic
- ▶ **SEAMLESS INTEGRATION WITH UTILITY CIS** by replicating rates from CIS and calculating Net Bill Credit for customers

## BENEFITS

- ▶ **TOTAL OPERATIONAL AND ANALYTICAL SUPPORT** including rate design, customer engagement/acquisition, customer service, and billing and settlement
- ▶ **FACILITATES FASTER PROGRAM ADOPTION** by supporting consolidated billing and removing key adoption barriers
- ▶ **FAST TIME TO MARKET** with cloud-based services launching programs in months
- ▶ **SUBSTANTIALLY REDUCED UPFRONT INVESTMENT** compared to CIS upgrades and custom developments
- ▶ **MINIMIZE PROJECT RISK** utilizing a productized, proven, cloud-based solution
- ▶ **REGULATORY COMPLIANCE** with SOX, SOC, security and other regulations, as compared with manual billing.
- ▶ **LOWER OPERATING COST** with one solution supporting the entire Community Solar rate life-cycle
